

KNOW US

KILIFEU : While i had nothing
I ate the rest of last night,
Took the butt of cigarette,
Collected some coins.
I went to the coffee seller
Who served me a cup before I left
I rushed to stationary.
You know, the situation is critical for all,
No need to earn money legally
Because nobody know if it is or not.
I get into debt
With bills that are increasing, the bruised hearts,
The shortage of gas and rice.
You employ and dismiss constantly,
All your promises were only lies.
Country of anarchy, monarchy, hypocrisy, whim!
They promise you this but make the opposite.
The leaders embezzle money, build buildings,
Collect cars. The young people increasingly despair.

REFRAIN: They really do not know us, know us
You'd better know us before talking about us
You'd better know us before talking about us
We are in a contradictory country

I say they don't know us man
We are in a contradictory country
I say they don't know us, blow

THIAT: The country is full of criminals,
Clans, crooks, charlatans.
Nobody follows the rules. They cut electricity constantly.
People are fans of dancers
Expose themselves to attacks.
They treat you stupid,
Embezzle funds,
Go off the rails.
The ship changed course.
Members of parliament are there only for them.
People do not know any more where they are there
Because it all goes wrong.
Our objective is to gain pounds
Through our sounds,
To be members of the round.
Like a Louis de Funès movie
Gain Guinness World Records.
Money does not circulate any more,
Everyone is in their own business.

REFRAIN: They really do not know us, know us
You'd better know us before talking about us
You'd better know us before talking about us
We are in contradictory country
I say they don't know us man
We are in a contradictory country
I say they don't know us, blow
